Dark Web & Deep Web – What's Hidden Online?

Dark web

The dark web is a hidden part of the internet, not indexed by search engines, accessed through specialized software like Tor, and used for both **legitimate and illegal activities (trade by Bitcoins)**, including anonymous communication, bypassing censorship, and facilitating illegal transactions.

SURFACE WEB VS. DEEP WEB VS. DARK WEB

Hunting The Dark Webs Biggest Villain

Comments in 50 words:

Requirements:

Paragraph 1 : What are your thoughts on Bitcoin? Do you believe public cryptocurrencies like Bitcoin will become official legal digital assets in the future?

Paragraph 2: Why do you think it's difficult to detect illegal activities on the dark web? (The technologies they used?)
